Glossy

COLLECTION

Inspired By The Beauty of Nature

Glossy finish tiles that ideal for use in
Spaces seeking to convey peace,
With natural and timeless decoration.

1200X1800mm

Designs Meet Creativity

The all new tiles gives an Appearance offering unique Decorative potential.

Save Nature Save Earth Save Life

The Beauty Of Nature Restored

Our Sintered Stone offering is an environment-friendly product. Decreasing the need of mining and extracting natural stones from natural sources, Sintered Stone is made using recycled stone in addition of other materials. Sintered Stone is truly saving the Earth and nature by redefining stone surfaces.

Safeguarding Nature

Motto's Sintered Stone makes a fascinating impact on one and all. While being technologically advanced and exotically beautiful, it is also something that doesn't harm the nature in ways the traditional methods of natural stone extraction do.

APPLICATION

The application layers proposed here under are to be taken as an indication, and have the sole purpose of explaining how to obtain a correct flooring.

DOOR / WINDOW
FRAME

Introducing our all range of full body tiles for window and door frames, that serve as accent pieces in every space.

TRADITIONAL
INSTALLATION

Traditional installation is ideal for floorings that will be driven over by vehicles.

DRY INSTALLATION
ON GRASS / GRAVEL

Installing directly on top of grass enables the creation of paths and walkways that blend in perfectly with the surroundings.

COUNTER
TOP

This tiles has long been the premier choice of builders and designers for countertops due to both its beauty and durability.

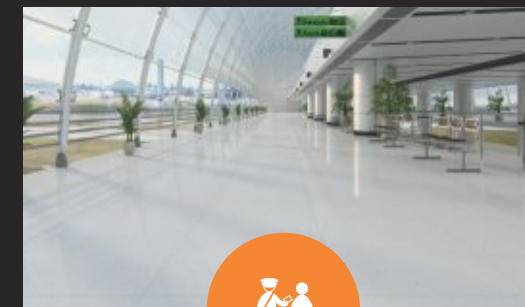

FACADE
LAYING SYSTEM

Facade systems comprise the structural elements that provide lateral and vertical resistance to wind and other actions.

STAIRCASE

Full-body tiles are a popular choice for both indoor and outdoor staircase. These tiles offer the steps a fashionable aesthetic while also providing a lasting surface.

HEAVY TRAFFIC

These tiles have the ability to withstand a huge amount of weight without being scratched or marked.

BENEFITS

We feature a unique collection of full-body series that add aesthetic value to your space. As these slabs are unglazed, they have high slip resistance, abrasion resistance, and are highly wear and tear resistant.

EDGE PROFILES

Fullbody 1200x1800mm designs are available in matt finishes and different types of edge profiles to expand your design options. Offering unmatched durability with no maintenance, easy-care convenience, and superior stain resistance, we are back with our surfaces with a transferable Full Lifetime Warranty to ensure years of flawless service.

This design has been beautifully crafted with particular attention paid to different types of edges which help to not only understand the design pattern of different areas but also satisfy the requirements of the perfect fitting.

WORKING WITH THE VARIOUS VERSIONS OF

CUTTING WITH DIAMOND DISCS

Our products can be cut using diamond discs fitted onto the hand-held electrical grinding machine. The speed of Disc rotation must be high (>10000 RPM) and should have a low feed rate (< 1 m/min). It may be required to cool the disc with water. Recommended discs are the thin types generally used for cutting porcelain stoneware. The surface should be kept on a FLAT base while cutting without any gap underneath

DRILLING

You can use cutting discs fitted to battery-operated screwdrivers or angle grinders, electrical drills as an alternative.

INTERNAL CUT / L-SHAPED CUT

To get internal and L-shaped corners & to reduce the risk of breakage, round off the vertex of the internal corner using bits with a radius of at least 5mm. Then cut with diamond discs, be cautious to stop moving the cutting tool forward. To drill and cut using diamond discs, follow the instructions provided above.

When using these tools:

- Cool the point being drilled with water
- Don't put too much pressure and bear in mind the resistance of the type of laminated stoneware you are working on
- If you are using tungsten bits, start drilling at a low speed
- If you are using drills or screwdrivers, do not select hammering mode

EDGE-FINISHING

CLEANING & MAINTENANCE

Our products are non porous (due to their high quality raw materials, stringent production parameters and state of the art technology), hence any dust or deposited waste cannot penetrate the surface.

For most cases only a damp cloth is sufficient for cleaning.

Regular cleaning highlights the aesthetic features of the surface and gives it exceptional shine.

For highly aggressive cleaning caused by some common food and substances follow the table below.

TYPE OF STAIN	CHEMICAL PRODUCT	EXAMPLE
Grease	Alkaline - Solvent	Detergent
Oil	Solvent	Ammonia, Baking Soda
Ink	Oxidant - Solvent	Alcohol, Liquid Bleach, Nail Paint Remover
Rust	Acid	Hydrochloric Acid, Vinegar, Red Harpic
Lime	Acid	Descaling Reagent, Hydro Chloric Acid
Cement	Acid	Hydro Chloric Acid
Wine	Alkaline	Ammonia, Liquid Bleach
Coffee	Alkaline - Solvent	Ammonia, Liquid Bleach
Rubber	Solvent	Alcohol, Thinner
Plaster	Acid	Hydro Chloric Acid
Candle Wax	Solvent	Alcohol, Thinner
Iodine	Oxidant	Liquid Bleach
Blood	Oxidant	Liquid Bleach
Ice Cream	Alkaline	Liquid Bleach

Note: It is recommended that any kind of stain needs to get clean immediately / as soon as possible.
